

*Activity*

OnClickListener

com.example.qrpoll.MainActivity

```
classDiagram
    class Activity
    class OnClickListener
    class MainActivity["com.example.qrpoll.MainActivity"]
    MainActivity --|> Activity
    MainActivity --|> OnClickListener
```

The diagram illustrates the class hierarchy for MainActivity. It is a UML class diagram with three classes represented as rectangular boxes. At the top left is the 'Activity' class, with its name in italics. At the top right is the 'OnClickListener' class, with its name in a standard font. At the bottom center is the 'com.example.qrpoll.MainActivity' class, also in a standard font. Two solid-line arrows point from the MainActivity box to the Activity and OnClickListener boxes, indicating that MainActivity implements both interfaces.
